

TRAINING SYSTEMS

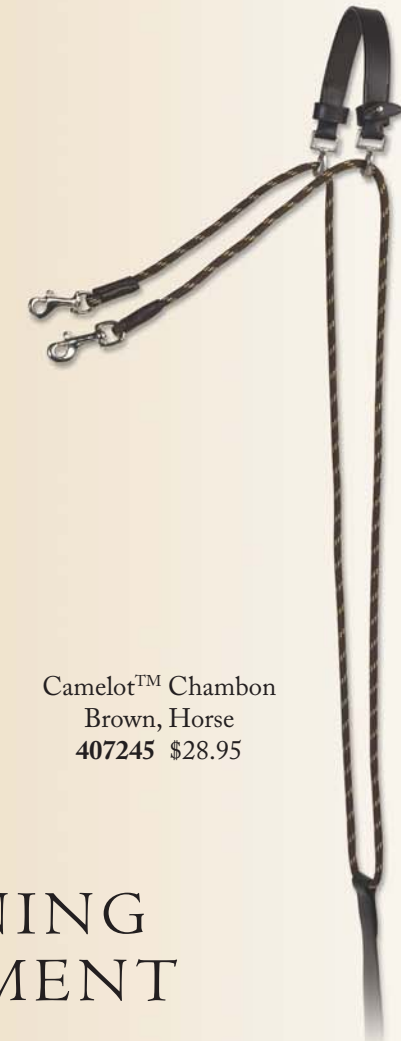

Pessoa™ Longeing System. Horse and Pony sizes. **460300 \$159.95**

*P*essoa™ Longeing System: Invented by international show jumping rider, Nelson Pessoa™, this system is designed to encourage balance and a gradual build-up of topline. It consists of an easy-to-put-together array of ropes, clips and pulleys, as well as a breeching strap that passes behind the horse's hindquarters, and is used in conjunction with a training surcingle while the horse is being lunged.

*B*ased on the principles of pressure and release, the Pessoa™ Longeing System helps to place the horse in a better position to assist muscle build-up, and increases use of the horse's back muscles. The Pessoa™ Longeing System can assist maintenance of muscle tone in fit horses, while less experienced horses can be guided into the correct shape. The Pessoa™ Longeing System can be used in four different positions, depending on the horse's level of training and fitness. 

Camelot™ Gogue
