GEL PAD

TRIPLE ACTION

1 Action One: (Shock absorption)
Distribute the intensity of the pressure created by the rider over a wider area.

2 Action Two: Reduce the heat and pressure developed by the thermodynamic effect and prove to be of therapeutic benefit to the horses' back.

3 Action Three: Reduce strain and injuries to the spine of the rider.

TR
Top
Riding

- Anatomically shaped GEL PAD
- It's innovative shape extends the triple action to all points of contact between saddle and horse.
- The unique textured surface creates a self-massaging action for a maximum therapeutic effect.
- Lined in strong, practical, washable material.
